

For the End Wall, match the thickness "T" and reinforcing used for the pipe apron.

Dimension "E" shown is the minimum and is considered the design length. Adjust for any difference between the actual length of concrete apron installed and the length indicated hereon within the length of concrete culvert pipe furnished.

Install connected pipe joints as shown on DR-121.

When specified in the contract documents, install pipe apron guards as shown on DR-213. Adjust connection locations to avoid conflict with end wall. Pipe apron guards are incidental to "Concrete Aprons".

Slight variations in both shape and dimensions from those shown may be accepted if approved by the engineer.

① Tongue end used on inlet end section. Groove end used on outlet end section.
